DETAILED ACTION

Allowable Subject Matter

Claims 117-135 are allowed.

The following is an examiner's statement of reasons for allowance:

The method of measuring an eye aberration and implanting an intraocular lens where the spherical aberration of the lens offsets the spherical aberration of the cornea as claimed is not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Glick et al (US Pat. No. 6,616,692) disclose implanting an intraocular lens; however, there lacks a teaching or suggestion to characterize a surface of the cornea as a mathematical model and model the intraocular lens based on the model.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Manuel whose telephone number is (571) 272-4952.
